Technical Information: Chainsaw lubricant, oil-free

Chemical name :	Chainsaw lubricant, oil-free
	Water-based chainsaw lubricant with additives
biodegradability :	min. 90 %
advantage :	Oil-free; can also be used in agriculture and forestry
Notes :	This product offers an environmentally friendly solution for operating chainsaws and other equipment that requires lubricants.
Synonym :	Ölfreies Kettensägenöl, Biologisches Kettensägeschmiermittel

General informations :

Our chainsaw lubricant offers numerous advantages over conventional, mineral oil-based products. It is biodegradable and free of mineral oil, making it an environmentally friendly alternative. Thanks to its water-soluble properties, it is easy to clean and leaves no harmful residues in the environment. Its excellent corrosion protection ensures that your equipment remains functional for longer and requires less maintenance.

A practical example from everyday use: while conventional oils can often lead to deposits that impair saw performance, our product remains clean and efficient. In addition, we can offer the chainsaw lubricant as a white-label product—customizable with your name and branding.

Application :

The product should be applied evenly to the saw chain. Make sure that all moving parts are sufficiently coated. If necessary, the lubricant can be easily washed off with water.

Hazard Informations :

Chainsaw lubricant is not subject to labeling and is not classified as dangerous goods under ADR. Nevertheless, we handle all our products with the utmost care and take all necessary measures to ensure they are properly labeled and handled safely. The product is classified as slightly hazardous to water (WGK 1), so any release into the environment should be avoided. Standard safety precautions should be observed when handling it.
