Technical Information: Contract bottling in 250–1,000 ml bottles

Chemical name :	Contract bottling in 250–1,000 ml bottles filling of liquid products into bottles
filling from :	Tankers, IBCs, drums
filling to :	Bottles, 250–1000 ml, with labelling and outer packaging
Synonym :	Flaschenabfüllung, Abfüllung Reiniger Abfüllung Düngemittel, Abfüllung Additive
General informations :	We refill your liquid products, such as fertilizers, cleaners, additives, and biotech products, from tankers, IBCs, or drums according to your specifications and reliably fill them into bottles of 250–1000 ml. In addition, we offer labeling and order picking, including palletizing.

Application :

Bottling is carried out using automatic filling systems, each of which is newly configured for the product to be filled. A mixture of multiple components (contract manufacturing) can be prepared before filling according to your specifications. The labels can be created by us according to your specifications.

Hazard Informations :

Unfortunately, we cannot fill hazardous materials with a flash point below 40 °C. Before filling, we require a safety data sheet for the products to be filled. If such an SDS is not available, our hazardous materials officer can assist you in preparing the safety data sheets.
