Technical Information: Filling into 2.5–30-litre jerrycans

Chemical name :	Filling into 2.5–30-litre jerrycans
	Contract filling of liquid products into 2.5–30-litre jerrycans
filling from :	Tankers, IBCs up to a maximum delivery temperature of 60°C
filling to :	jerry cans or hobbocks , with or without UN approval, 2,5–30 litres
General informations :	We fill plant oils, cleaners, biotech products, and other liquids from tank trucks, IBCs, or drums into canisters according to your specifications and reliably in compliance with specified net weights. In addition, we offer labeling and order picking, including palletizing.

Application :

Filling is carried out using automatic filling systems, but can also be done manually if required. A mixture of several components (contract manufacturing) can be carried out before or during filling according to your specifications. Labels can be supplied by you or produced by us according to your specifications.

Billing is based on unit quantity or quantity unit, or as agreed.

Hazard Informations :

Unfortunately, we cannot fill hazardous goods with a flash point below 40°C, or strongly odorous or aggressive products. Before filling, we require a safety data sheet for the products to be filled. If such an SDS is not available, our hazardous goods officer can assist you in preparing the safety data sheets.
