Technical Information: Filling into Ex-protected IBCs

Chemical name : Filling into Ex-protected IBCs

Contract filling of liquids into IBC containers

filling from : Tankers, IBCs up to a maximum delivery temperature of 60°C

filling to : IBC, UN-approved, with a net capacity of 1,000 litres, explosion-proof IBC

Notes : We would be happy to organise the procurement of the IBCs for you

General informations : We fill liquid products from tanker trucks or isotanks to your specifications and reliably package them in IBCs while adhering to specified net weights. In addition, we offer labeling and order picking, including palletizing.

Application :

Filling is carried out manually or via our automated filling system. A mixture of multiple components (contract manufacturing) can be prepared according to your specifications before or during filling, by prior arrangement. We can create the labels according to your specifications.

Hazard Informations :

Unfortunately, we can only fill a limited number of hazardous materials or strongly odorous liquids. Before filling, we require a safety data sheet for the products to be filled. If such an SDS is not available, our dangerous goods officer can assist you in preparing the safety data sheets.
