Technical Information: Min DB Stone meal-based litter

Chemical name :	Min DB Stone meal-based litter
	Stone meal-based litter to combat poultry mites
The Alternative for :	chemical miticides
Areas of Application :	Poultry houses infested with bird mites
Notes :	A versatile mite remover with no hazardous ingredients
Synonym :	Milbenentferner, Bekämpfung rote Vogelmilbe
General informations :	MinDB poultry litter is a mineral product for the thorough yet gentle removal of mites in poultry houses. The fine powder penetrates the mites' tracheae and thus prevents their reproduction. Other components act on the insects' chitin armor and help reduce live insects. The product is non-toxic to poultry and humans and is also not a biocide within the meaning of the Biocidal Products Regulation.

Application :

MinDB poultry litter is delivered ready for use. Mix it manually under the straw or other bedding in the poultry house.

MinDB poultry litter can be spread easily and is therefore ideally suited for use.

The low grain size of MinDB poultry litter enables rapid and complete coverage of contaminated surfaces.

Hazard Informations :

MinDB poultry litter is not subject to labeling requirements under the Hazardous Substances Ordinance and EC directives. Always read the label and product information before use. Keep the packaging tightly closed. The usual precautions for handling pest control products must be observed.
