Technical Information: Mineral Agrar Powder

Chemical name :	Mineral Agrar Powder
	A stone meal-based granular treatment for soil fleas or weevils
The Alternative for :	chemical miticides
Areas of Application :	Fields infested with flea beetles or weevils
Notes :	A versatile pollinating agent with no hazardous ingredients
Synonym :	Erdfloh oder Rüsselkäfer biologisch bekämpfen

General informations :

Mineral Agrar Powder Fine is a mineral product for the thorough yet gentle reduction of flea beetles and weevils in fields.

Flea beetles and weevils disappear almost immediately. The silicate contained in Mineral Agrar Powder Fine also prevents the insects from feeding on the leaves over the long term, thereby inhibiting their reproduction.

Mineral Agrar Powder Fine is not toxic to humans and is also not a biocide within the meaning of the Biocidal Products Regulation.

Application :

Mineral Agrar Pulver fein is delivered ready for use.

Application is carried out with a lime spreader, possibly borrowed from a local farm supply store. This achieves an even dusting, with the leaf surface being thoroughly coated with the product.

The low particle size of Mineral Agrar Pulver fein enables rapid and complete coverage of the infested surfaces.

Hazard Informations :

Mineral Agrar Powder fine is not subject to labeling according to the Hazardous Substances Ordinance and EC directives. Always read the label and product information before use. Keep the container tightly closed. The usual precautions when handling pest control products must be observed.
