Technical Information: SPC Antifreeze for Hydraulic Systems, Biodegradable

Chemical name :	SPC Antifreeze for Hydraulic Systems, Biodegradable
	Water-based antifreeze with additives
pH :	9-10
Areas of Application :	Antifreeze and Lubricant for Hydraulic Systems
Packing :	drums / IBC / bulk
Notes :	The antifreeze is flame-retardant and provides excellent corrosion protection.

Synonym :	Biologisch abbaubares Frostschutzmittel, umweltfreundliches Frostschutzmittel
General informations :	Our biodegradable antifreeze for hydraulic systems offers an environmentally friendly alternative to conventional products. It is frost-resistant down to -48° and flame-retardant. In addition, it provides excellent corrosion protection. Because it uses water as a base, it is safe to use and reduces the risk of fires. It is ideal for use in cold climates or in applications where a high level of fire protection is required.
Application :	Before use, the hydraulic system should be completely drained and cleaned. The antifreeze should then be filled in accordance with the instructions of the manufacturer or the equipment manufacturer.
Hazard Informations :	Our antifreeze for hydraulic systems is not subject to labeling and does not constitute dangerous goods under ADR. It is classified as slightly hazardous to water (WGK 1), so spills into the environment should be avoided. The usual safety precautions should be observed when handling it.
