| <b>Areas of Application :</b> | reduces inhibitions in fermentation, activates methanogenesis                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>Synonym :</b>              | Biogasaktivator, Methanisierung                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>General informations :</b> | <p>SPC Cell Activator BRK is an activator for anaerobic fermentation processes developed by the biologist and expert in biogas plants and fermentation processes Bernhard Rühl and manufactured by us under license.</p> <p>The protein complex contained in SPC Cell Activator BRK increases cell growth and thus activates methanation.</p> <p>The minerals additionally contained in SPC Cell Activator BRK eliminate existing inhibitions in the biology. SPC Cell Activator BRK eliminates disturbances in ammonium/ammonia synthesis by balancing existing imbalances.</p> |

**Application :**

To eliminate inhibitions in the fermentation process, add SPC Cell Activator BRK to the fermenter according to the dosage instructions. Continuous movement in the fermenter accelerates the activation process.

**Hazard Informations :**

The product can cause eye damage through direct contact. Therefore, safety goggles must be worn when handling the substance.
