Technical Information: SPC Cold Degreaser NAWARO

Chemical name : SPC Cold Degreaser NAWARO

Mineral oil-free cold degreaser made from renewable raw materials

The Alternative for : Petroleum, special-purpose petrol and solvents.

Cleaning and degreasing of : steel, tools, machines

Moisture : 0,01%

Synonym : - Biologischer Kaltentfetter, Umweltfreundlicher Kaltreiniger, Nachhaltiger Entfetter NAWARO

General informations :

SPC Cold Degreaser NAWARO offers an environmentally friendly alternative to conventional mineral oil-based degreasers. Thanks to its biodegradable composition, which is based on renewable raw materials, it significantly reduces environmental impact.

Customers benefit from the same effective cleaning results as with traditional products, but without the negative effects of mineral oils. In practice, this means that, for example, in the automotive industry, vehicle parts can be thoroughly degreased without leaving harmful residues, which increases the safety and sustainability of production processes.

Another advantage is its absence of labeling requirements, which simplifies use across various industries, as no additional safety labels are required. In addition, SPC Cold Degreaser NAWARO is water-repellent and offers good corrosion protection, which extends the service life of cleaned parts.

Our solution also includes the option to purchase SPC Cold Degreaser NAWARO as a white label product. This allows our customers to market the product under their own brand name and label it according to individual requirements, strengthening brand identity and enabling customized solutions.

Environmental compatibility:

SPC Cold Degreaser NAWARO is characterized by its high environmental compatibility. The use of renewable raw materials and complete biodegradability ensure that the product leaves no harmful residues in the environment. It is free of volatile organic compounds (VOC) and thus helps reduce air pollution. In addition, sustainable production conserves natural resources and promotes environmentally conscious manufacturing.

Application :

To use SPC Cold Degreaser NAWARO effectively, first apply an appropriate amount of the product to the surface to be cleaned. Allow it to sit briefly so the degreasing agent can spread optimally. Then wipe thoroughly with a clean cloth or sponge. For stubborn dirt, the process can be repeated if necessary. After application, the cleaned parts should be well ventilated to ensure complete drying. The product is versatile and suitable for various materials such as metal, stone, and glass.

It is advisable to carry out a test on an inconspicuous area before large-scale use to ensure compatibility with the respective material. Not suitable for rubber, natural rubber, silicone.

Sustainability:

With SPC Cold Degreaser NAWARO, we are making a statement for sustainable cleaning solutions. By using environmentally friendly raw materials and minimizing our ecological footprint, we actively contribute to protecting the environment. Our production processes are designed to use resources efficiently and reduce waste. We are also committed to continuous research and development in order to keep improving our products and make them even more sustainable.

Hazard Informations :

Although SPC Kaltentfetter NAWARO is considered environmentally friendly and safe, basic safety precautions should still be observed. Protect your eyes from contact with the product by wearing suitable safety goggles. Avoid direct skin contact and, in the event of contact, wash affected areas thoroughly with soap and water. Always store the product out of the reach of children and pets. In the event of intolerance or allergic reactions, discontinue use immediately and consult a doctor if necessary. SPC Kaltentfetter NAWARO is classified as slightly hazardous to water (WGK 1), so spills into the environment should be avoided.
