Technical Information: SPC GTM 8, Grinding Fluid, Biodegradable

Chemical name :	SPC GTM 8, Grinding Fluid, Biodegradable
	Water- and polymer-based, mineral oil-free grinding and cutting fluid
pH :	8,0 – 8,4
Viscosity at 40°C :	7,2 – 8,8 mm ² /s
Synonym :	Schleifflüssigkeit, Schneidflüssigkeit, GTM 8

General informations :

SPC GTM 8, grinding fluid, biodegradable, is a mineral-oil-free cutting and grinding fluid based on water/polymer.

It is characterized by its high performance density and excellent corrosion protection.

SPC GTM 8, grinding fluid, biodegradable, is universally applicable for machining various materials such as plastics, steels, non-ferrous metals, and aluminum.

SPC GTM 8, grinding fluid, biodegradable, has very good cooling and flushing properties and is compatible with sealing materials. It is odorless and does not form mist. We fill SPC GTM 8, grinding fluid, biodegradable, into various containers according to customer requirements.

Biodegradability after 28 days according to OECD 301: >90 %

Application :

SPC GTM 8, biodegradable grinding fluid, is ideal for machining various materials. With its high performance density and excellent corrosion protection, it offers the user high efficiency and a long tool life. Thanks to its good cooling and flushing effect, it ensures clean and precise machining of workpieces.

Hazard Informations :

SPC GTM 8, grinding fluid, biodegradable, is not subject to labeling under Regulation 1272/2008 [CLP] and therefore is not classified as dangerous goods. However, it is classified as slightly hazardous to water (WGK 1), so spilling it into the environment should be avoided. When handling it, the usual safety precautions should be observed.
