Technical Information: SPC Iron Fluid BIO 15

Chemical name :	SPC Iron Fluid BIO 15
	Liquid, iron-containing fertilizer supplement for soil improvement
content :	organic iron compounds with bio-based chelating agent
other :	Iron content: approx. 15%; made available to bacteria and plants by bioemulsifiers
IMCO :	KI 0 Packing
CAS-No. :	Gemisch

- General informations :** To prevent and correct iron deficiency, it is very important to keep in mind that the problem is usually not a lack of this element in the soil. Rather, it is its low availability to the root system: iron is there, sometimes in large amounts, but it is bound by the chemical properties of the soil. Therefore, the best strategy is to use iron in a liquid organically bound form, that is, protected by specific molecules that make the nutrients available to plants regardless of the chemical conditions.
- Application :** SPC Iron Fluid BIO 15 is used either as a solution or as a concentrate depending on the application. SPC Iron Fluid BIO 15 may settle after prolonged storage and should be stirred again before spraying if necessary.
- Hazard Informations :** SPC Iron Fluid BIO 15 is not a hazardous substance within the meaning of the Hazardous Substances Ordinance.
- Nevertheless, we recommend observing general precautions and keeping the product out of reach of children.
