Technical Information: SPC NPK fertilizerseries

Chemical name :	SPC NPK fertilizerseries
	High-quality water-soluble NPK fertilizers for foliar application
assay :	Nitrogen, phosphorus, and potassium in varying concentration
CAS-No. :	Gemisch
Synonym :	NPK Dünger, Sprühdünger, Beregnungsdünger, Dünger für Gewächshäuser

General informations :

SPC NPK fertilizer is quickly and completely soluble in water and can then be sprayed or irrigated.
Due to the low pH value, rapid absorption into the leaves is achieved, making the results visible relatively quickly.
Significant content of potassium and phosphorus, as well as trace elements in chelated form.
Suitable for all crops, all soil types, and all phenological stages.
All products are manufactured in the EU.

Application :

The products in the SPC NPK range are used with varying nutrient content depending on the specific requirements. You can also view our individual articles in the range for this purpose. We will be happy to advise you on your specific application.

Hazard Informations :

SPC NPK fertilizer is not a hazardous substance. However, we recommend observing the general safety instructions for handling fertilizers and storing the product out of the reach of children.
