Technical Information: SPC Organic Cleaner OTEO

Chemical name :	SPC Organic Cleaner OTEO
	Organic cleaning products made from plant-based raw materials
The Alternative for :	neutral cleaners containing surfactants
Cleaning and degreasing :	thoroughly dissolves grease and oil, cleans and disinfects
Notes :	A versatile cold cleaner, based on natural raw materials

General informations :

The bio-cleaner OTEO has a fruity scent and is the alternative for effectively cleaning and degreasing soiled components, e.g. made of steel, stainless steel, or non-ferrous metals.

Bio-cleaner OTEO dissolves even heavy soiling, such as hard-to-remove special greases, rubber abrasion, oils, pastes, or bitumen and wax residues. Selected additives from renewable raw materials enhance the excellent dissolving power.

The cleaning effect of bio-cleaner OTEO is supported by the high solvency of the raw materials used.

Application :

The bio-cleaner OTEO is delivered ready to use. Apply manually with a cloth, brush, or washing brush and wipe off. The bio-cleaner OTEO is ideal for cleaning small parts in a brush washing sink.

The low surface tension of the bio-cold cleaner FRM-OT enables rapid and complete wetting of soiled surfaces. The product's low viscosity supports cleaning by quickly carrying away the dissolved dirt.

After cleaning, simply rinse with clear water.

Hazard Informations :

The OTEO bio-cleaner is subject to labeling requirements under the Hazardous Substances Ordinance and EC directives. Read the label and product information before use. Keep the container tightly closed. The usual precautions when handling cleaners must be observed. Plastics, elastomers, rubber, and seals should be tested for resistance.
