Technical Information: SPC Protein Foam Reducer BR

Chemical name : SPC Protein Foam Reducer BR

Additive for controlling protein foam in fermentation processes

General informations : SPC Protein Foam Reducer BR is a highly effective product specifically designed to support microorganisms in the fermenter in efficiently breaking down proteins. By reducing the foam caused by undegraded proteins, our protein foam reducer enables an increase in yield in biogas plants.

Application : Depending on the load on the fermenter, we recommend a dosage of 1–2 kg of SPC Protein Foam Reducer BR per 500 kg of feed per day. Simply add the product to the fermenter together with the feed to achieve optimal effect.

Hazard Informations : The SPC protein foam reducer BR is a formulation consisting exclusively of non-hazardous and readily biodegradable ingredients. Nevertheless, we recommend observing the general safety instructions for handling chemicals. The product can cause eye damage upon direct contact. Therefore, safety goggles should be worn when handling the substance.
