Technical Information: SPC Struvite Remover 257

Chemical name : SPC Struvite Remover 257

cleaner for removing struvite in wastewater treatment and biogas plants

Synonym : Struvit, Gülleaufbereitung, Kläranlage, Entfernung von Struvit.

General informations : In wastewater treatment and slurry processing, such as in biogas plants, high concentrations of ammonium, magnesium, and phosphate can occur in some areas, so that the saturation concentration of struvite is exceeded. In these areas, struvite deposits form, which can severely impair the operation of wastewater treatment and slurry processing plants. SPC Struvite Remover 257 removes these deposits quickly and reliably.

Application : Instructions for use:
Dissolve SPC Struvite Remover 257 in water at 50°C and add it directly into the affected overflow.

Hazard Informations : Hazard warnings:
The usual precautions applicable to chemicals as well as the hazard and safety instructions on the product label must be observed.

Label : GHS07

Version: 03.08.2026
