Technical Information: SPC cellactivator BR

Chemical name :	SPC cellactivator BR
	activator for anaerobic fermentation processes
content :	Protein complexes, minerals, trace elements
Areas of Application :	reduces inhibitions in fermentation, activates methanogenesis
Synonym :	Biogasaktivator, Methanisierung
General informations :	SPC cellactivator BR is an activator for anaerobic fermentation processes developed by biologist and expert in biogas plants and fermentation processes Bernhard Rühl and manufactured by us under license. The protein complex contained in SPC Zellaktivator BR increases cell growth and thus activates methanization. The minerals additionally contained in SPC Zellaktivator BR eliminate existing inhibitions in the biology.

Application : To eliminate inhibitions in the fermentation process, add SPC Cell Activator BR to the fermenter in accordance with the dosage instructions. Continuous movement in the fermenter accelerates the activation process.

Hazard Informations : The product can cause eye damage upon direct contact. Therefore, safety goggles must be worn when handling the substance.
