Technical Information: SPC cleaner GBA

Chemical name : SPC cleaner GBA

Environmentally friendly cold cleaner with low hazard potential

General informations :

The cold cleaner GBA has a pleasant odor and favorable environmental properties. Cold Cleaner GBA is readily biodegradable. As a result, the use of Cold Cleaner GBA is steadily increasing in a wide variety of areas. Due to its composition, Cold Cleaner GBA is highly effective at removing contaminants from surfaces.

Cold Cleaner GBA replaces a wide range of environmentally harmful solvents that are increasingly being regulated in order to limit their impact on the environment and health.

Application :

The GBA cold cleaner is delivered ready to use. Apply manually with a cloth, brush, or washing brush and wipe off.

The GBA cold cleaner has a high flash point and evaporates more slowly than conventional solvents. The product is safe to handle, store, and use. The solvent properties of the GBA cold cleaner can be used in numerous industries, such as the metal industry, the automotive and aviation industries, as well as the semiconductor industry.

Hazard Informations :

The GBA cold cleaner is not subject to labeling requirements under the Hazardous Substances Ordinance and EC directives. Keep the container tightly closed. The usual precautions for handling cold cleaners must be observed.
