Technical Information: SPC paint remover GBA

Chemical name : SPC paint remover GBA

Environmentally friendly paint remover and stripper with low hazard potential

The Alternative for : paint strippers and paint removers that are harmful to health and the environment.

Areas of Application : Cleaning of non-porous surfaces

General informations : The SPC paint remover GBA has a pleasant odor and favorable environmental properties. The paint remover is readily biodegradable. As a result, the use of SPC paint remover GBA is steadily increasing in a wide variety of areas. Due to its composition, this product is highly effective at removing contaminants from surfaces. The product replaces a wide range of environmentally harmful solvents, which are increasingly being regulated to limit their impact on the environment and health.

Application :

The SPC paint remover GBA is supplied ready to use. Apply manually with a cloth, brush, or scrubbing brush and wipe off. The SPC paint remover GBA has a high flash point and evaporates more slowly than conventional solvents. The product is safe in handling, storage, and use. The solvent properties of the SPC paint remover GBA can be used in numerous industries, such as the metal industry, the automotive and aviation industries, as well as the semiconductor industry.

Hazard Informations :

The SPC color remover GBA is not subject to labeling requirements under the Hazardous Substances Ordinance and EC directives. Keep the container tightly closed. The usual precautions for handling chemicals should be observed.
