Technical Information: SPC propionic acid reducer

Chemical name : SPC propionic acid reducer

Synonym : Biogasaktivator, Methanisierung

General informations : SPC propionic acid reducer according to Rühl is an additive developed by biologist and expert in biogas plants and fermentation processes Bernhard Rühl and manufactured by us under license for anaerobic fermentation processes.

The SPC Activator according to Rühl activates methanization and eliminates inhibitions in the biology caused by excessively high propionic acid levels.

Application : To eliminate inhibitions in the fermentation process, add the product to the fermenter according to the dosage instructions. Continuous movement in the fermenter speeds up the activation process.

Hazard Informations : The product can cause eye damage through direct contact. Therefore, safety goggles must be worn when handling the substance.
