Technical Information: SPC rust protection oilfree 5-10

Chemical name :	SPC rust protection oilfree 5-10
advantage :	biodegradable, oil-free, easy to wash off
Areas of Application :	excellent protection against rust formation.
Packing :	drums / IBC / bulk
Einecs-No. :	Gemisch
CAS-No. :	Gemisch
Synonym :	Ölfreies Rostschutzmittel, Wasserbasiertes Rostschutzmittel

General informations :

SPC rust protection oilfree 5-10 is oil-free:

Traditional rust protection products are often based on oil, which can leave a sticky residue. This can cause dust and dirt to adhere to the treated surfaces. Our rust protection product oilfree 5-10 is oil-free and therefore leaves no sticky residues. This is especially beneficial for workpieces that need to be machined precisely, as there are no contaminants that could affect accuracy.

SPC rust protection oilfree 5-10 provides optimal protection:

Our rust protection product offers excellent protection against rust formation. This is especially important for workpieces stored in air-conditioned rooms, as these environments often have lower humidity, which can contribute to accelerated rust formation. With our product, you can be sure that your workpieces are protected against rust formation.

SPC rust protection oilfree 5-10 is water-soluble:

Another advantage of our rust protection product is its water solubility. This means it can be easily rinsed off with water without the need for special cleaning agents. This is a major advantage over oil-based corrosion inhibitors, as they are often difficult to remove and require special cleaners.

Application :

Apply SPC anti-rust agent oilfree 5-10 evenly to the surface to be protected. Allow it to dry completely. If necessary, the agent can simply be washed off with water.

Imagine you have a metal workpiece stored in an air-conditioned room. Over time, the metal begins to rust, which not only affects its appearance but can also impair the functionality of the workpiece. By applying our anti-rust agent oilfree 5-10, the workpiece is protected against rust. And when it is time to remove the anti-rust agent, you can simply rinse it off with water, without the need for special cleaners.

Hazard Informations :

SPC rust protection agent oilfree 5-10 is not subject to labeling and does not constitute dangerous goods under ADR. Nevertheless, we handle all our products with the greatest care and take all necessary measures to label and handle them safely. Rust protection agent oilfree 5-10 is classified as slightly hazardous to water (WGK 1); therefore, spilling into the environment should be avoided. Usual safety precautions should be observed when handling it.
