Technical Information: SPC skin protection cream

Chemical name :	SPC skin protection cream
	Skin protection cream for use with oils, greases, and cooling lubricants
advantage :	Film-forming system: Specially developed for smudge-free skin protection
advantage :	Silicone-free; can also be used in agriculture and forestry
Packing :	Aerosol cans, tubes, plastic containers, dispensers
Synonym :	Hautschutzbalsam, Schutzcreme für die Hände, Arbeitscreme

General informations :

SPC skin protection cream provides effective protection against contact dermatitis and skin irritation when working with various substances such as oils, greases, cleaning agents, and coolant lubricants.

SPC skin protection cream forms an invisible protective film on the skin surface and prevents direct contact with allergenic substances.

SPC skin protection cream is breathable and does not dry out the skin. In addition, grip remains unchanged, which supports workplace safety.

SPC skin protection cream can also be offered as a “white label” product for resellers with customer-specific labels.

Application :

Advantages:

- Residue-free and long-lasting protection
- Silicone-free
- Prevents contact eczema and skin irritation
- Protects against direct contact with varying work substances
- Keeps the skin breathable and supple
- Maintains grip for safe working

Instructions for use:

Before applying the cream, wash and dry the skin thoroughly. Apply a sufficient amount of cream and rub it in carefully between the fingers and nails. For optimal protection, use regularly.

Hazard Informations :

SPC skin protection cream is subject to the Cosmetics Regulation. Labeling in accordance with the Hazardous Substances Ordinance is not required. Nevertheless, we recommend observing the general precautions and keeping the product out of the reach of children.
